

## **Accessibility statement**

Despite being a historic building in a clifftop location, there are many areas of the hotel that are currently accessible. Senior management consider accessibility a top priority, and there are major development works scheduled for completion for the 2023 season which include some exciting improvements as far as accessibility is concerned.

### **Lifts:**

There is currently a lift from the bar area (which is on the same level as the main entrance) and the Vista lounge. *An additional lift is to be installed that will operate between the 1<sup>st</sup> and 2<sup>nd</sup> floors.*

### **Car Parking:**

We have ample parking, with several spaces very close to the reception area which is on the same level.

### **Bedrooms:**

There are 8 ground floor bedrooms, and 2 fully accessible bedrooms with bathrooms.

### **Restaurant:**

The restaurant is accessible and the Vista Lounge can be accessed using the lift, via from the bar area. Staff are trained to verbally explain the menu for partially sighted guests.

*Menus are being redesigned to include brail printing. Staff are to be given basic sign language training.*

### **Toilets:**

There is a disabled bathroom located on the ground floor

**Health Club:**

The health club is currently situated on the 1st floor with limited accessibility.

*The new Health Club being constructed for the 2023 season will be fully accessible.*

**Function Rooms:**

The function rooms are fully accessible

**Gardens, Outdoor Areas and Beach:**

Most of the garden is currently accessible via the path or lawn, and the outdoor terrace is accessible.

*There are new outdoor facilities being added for the 2023 season, including an outdoor wedding space, bar and dining area, all of which are accessible. New lighting will be installed in all outdoor areas, which will help partially sighted guests. The path that leads from the reception area down to Polurrian Cove is to be re-laid in tarmac before the 2023 season, which will allow easy vehicular and disabled access to the beach. A new lifeguard hut and toilet block is to be constructed on the beach, which will make the cove more accessible by the disabled and elderly.*
